Country Progress Report

April 2022

SUPPLEMENT TO THE 2021 GLOBAL PROGRESS REPORT OF
THE SUSTAINABLE BANKING AND FINANCE NETWORK

Sustainable
Banking and
Finance
Network

Creating Markets, Creating Opportunities

Acknowledgements

This Country Progress Report was developed by the SBFN Secretariat under the leadership of the SBFN Measurement Working Group and with guidance from the SBFN Jordan Country Coordinator Riccardo Ambrosini. Data are provided by the Central Bank of Jordan (CBJ) and verified by SBFN. The team is grateful for the support and guidance of CBJ representatives who provided data, participated in interviews, and reviewed and provided comments to this report, in particular Mohamad Amaireh, Executive Manager, Financial Stability Department.

About SBFN

Established in 2012, SBFN is a voluntary community of financial sector regulators and industry associations from emerging markets committed to collectively advancing sustainable finance in line with international good practice and national priorities. As of October 2021, SBFN members represented 63 institutions, 43 countries, and US\$43 trillion (86 percent) of the total banking assets in emerging markets. Members are committed to i) improving the management of environmental, social, governance, and climate change risks in financial sector activities, and ii) increasing capital flows to activities with positive environmental and social impacts, including climate change mitigation and adaptation. For more information, visit www.sbfnetwork.org

About IFC

IFC—a member of the World Bank Group—is the largest global development institution focused on the private sector in emerging markets. IFC works in more than 100 countries, using its capital, expertise, and influence to create markets and opportunities in developing countries. In fiscal year 2021, IFC committed a record \$31.5 billion to private companies and financial institutions in developing countries, leveraging the power of the private sector to end extreme poverty and boost shared prosperity as economies grapple with the impacts of the COVID-19 pandemic. For more information, visit www.ifc.org.

[National Financial Inclusion Strategy 2018-2020](#)
[Ministry of Environment](#)

[National Climate Change Strategy, Government of Jordan](#)
[National Green Growth Plan for Jordan](#)

1.3 Overall progress

Jordan is currently in the "Formulating" sub-stage of the "Preparation" stage. The country intends to launch a framework in the coming years. There is a formal initiative in progress, the Green Finance Strategy, led by the Central Bank of Jordan (CBJ). Multi-stakeholder engagement and awareness raising has been initiated, and additional engagement and capacity building will be conducted in the context of the elaboration of the Green Finance Strategy.

1.4 COVID response

The CBJ has launched several initiatives, including a financing program to the amount of 700 million Jordanian dinar to support small and medium enterprises (SMEs). It also injected additional liquidity into the financial sector by reducing the reserve requirement ratio from 7 to 5 percent, and conducted repurchase agreements with banks to provide additional liquidity. Banks have agreed to postpone loan installments on borrowers affected by the pandemic. Additionally, in March 2020 the Jordanian Government issued the Defense Order No. 1, which offers some relief measures on social security contributions for employers and impacts income tax and general sales tax in Jordan.

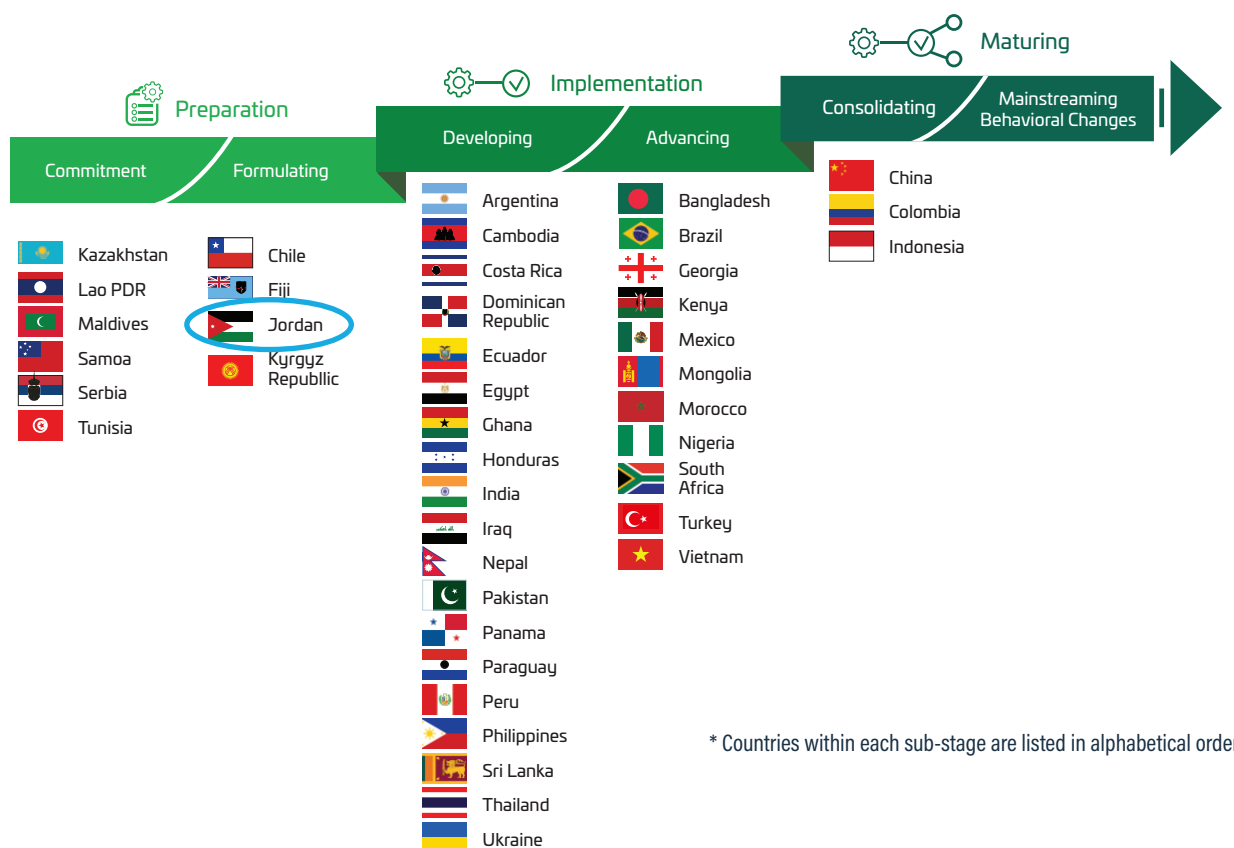

1.5 Ambitions for the next phase

The CBJ is currently planning to issue and implement a Green Finance Strategy with assistance from SBFN. An important area in the planned strategy is to require banks to take environmental and social risks and climate change impacts into account in their credit policies and lending criteria. Another goal is to extend or revisit the National Financial Inclusion Strategy, which ended in 2020 and had focused on enhancing financial inclusion, reducing the gender gap, and supporting SMEs. The CBJ aims to find ways to integrate this strategy with the planned Green Finance Strategy to enhance green finance in Jordan.

1.6 SBFN and IFC role

IFC has provided advisory services to the CBJ on their sustainable finance initiatives and capacity building, in partnership with the Government of Jordan. Through SBFN, the CBJ has shared its experience with other SBFN members and benefited from the collective SBFN knowledge base.

Figure 1: SBFN Progression Matrix - Overall Country Progress

“ The topic of sustainable finance is very important today. It's critical that central banks of all countries focus on green finance and climate change related financial risks. We want to learn from SBFN and other countries' experiences in this regard because we are in the beginning stages of working on a strategy. ”

Mr. Mohamad Amaireh
Head of the Financial Stability Department, Central Bank of Jordan

2. Status of Framework Preparation

Introducing a formal, national sustainable finance framework (such as a roadmap, policy, regulatory guidelines, or voluntary industry principles) has been shown to be foundational for designing effective strategies for countries to promote the shift to sustainable finance. Based on SBFN members' experiences, a number of steps are commonly required in preparation for doing so.

These include raising awareness within the sector, initiating dialogue among public and private sector stakeholders, and researching national priorities, requirements, and current practices with regard to sustainable finance.

The readiness of the country's framework preparation has therefore been reviewed according to three criteria:

- Is awareness raising being undertaken in the country, with leadership by either the financial sector regulator and/or the banking association (for example training, knowledge-sharing events, conferences and meetings, research, and publications)?
- Has a sector-wide dialogue been initiated towards the establishment of a national sustainable finance framework, involving relevant stakeholders (for example government and other public bodies, private and public financial institutions, regulators, and civil society organizations)?
- Has a timeline for the development of a policy been defined, including a clear schedule and milestones to launch the framework?

2.1 Awareness-raising practices

An important objective of the planned Green Finance Strategy is to work with banks to increase the level of awareness of sustainable finance and green banking practices, and to encourage knowledge sharing between banks and non-bank financial institutions. In 2018, the World Bank conducted a workshop to show banks how to take environmental and social risks into consideration, and how to take advantage of World Bank programs. Although banks in Jordan must ask for environmental approval from the Ministry of the Environment when lending to large projects, there is limited knowledge of green finance practices in the country. Additionally, the CBJ provides a mechanism for the provision of local financing for key economic sectors, notably the renewable energy sector.

2.2 Dialogue towards the establishment of a policy or voluntary principles

An internal meeting within the CBJ was held in May 2021 to begin work on a Green Finance Strategy. To this end, an internal working group is to be formed, consisting of representatives from the Financial Stability Department, the Banking Supervision Department, the Research Department, and Open Market Operations Department. This working group plans to collaborate with other stakeholders in the financial sector, including banks and associations of banks, to identify the most important policy interventions that can be put in place to enhance green finance in Jordan. The CBJ has approached other international financial institutions with experience in green finance to help prepare the strategy.

2.3 Timeline for the development of a policy or principles

A firm time frame for the formulation and implementation of the planned Green Finance Strategy has not yet been developed. The CBJ is still in the planning phase and has approached several international finance institutions with experience in sustainable finance and green banking to assist in the formulation of the Green Finance Strategy. There are plans to develop a provisional timeline, including policies and priorities. The Green Finance Strategy will focus initially on environmental and social risk management practices, including climate change risk, and the CBJ will set out its vision for the type of risk-management practices required of the financial sector.

3. SBFN Measurement Framework and Methodology

About SBFN

Established in 2012, the Sustainable Banking and Finance Network (SBFN) is a unique, voluntary community of financial sector regulatory agencies and industry associations from emerging markets committed to advancing sustainable finance in line with international best practice. SBFN is facilitated by IFC as secretariat, and supported by the World Bank Group.

As of October 2021, SBFN comprised 43 member countries representing over US\$43 trillion and 86 percent of total banking assets in emerging markets. Members are committed to collectively driving measurable change.

Why a measurement framework?

In 2016, members requested a systematic comparison of country approaches to developing national sustainable finance frameworks. The SBFN Measurement Working Group was established to convene member inputs on the design of a common framework to benchmark country progress and accelerate peer-to-peer knowledge exchange. The Framework is designed to inform the biennial SBFN Global Progress Report.

An evolving framework

The SBFN Measurement Framework reflects the activities, strategies, and tools that members use to promote sustainable finance in their countries. It evolves to match advances in country initiatives. It also incorporates the latest international standards and best practices identified by members as important to their efforts.

A member-led approach

The Framework was designed with extensive member input under the leadership of the Measurement Working Group and Co-Chairs. Updates to the Framework are guided by the Measurement Working Group and agreed by all SBFN Members.

Data collection in partnership with members

As of 2021, data collection for the SBFN Global Progress Report relies on member country reporting in line with the updated Measurement Framework. Information is supported by evidence, which is verified by the SBFN secretariat in collaboration with third-party service providers. Evaluation and milestones are objective and transparent. Members approve the final Global and Country Progress Reports.

The Framework can be used as:

a **mapping tool** to capture the dynamic interaction of collective insights, market-based actions, and policy leadership demonstrated by SBFN members as they move their financial markets toward sustainability;

a **benchmarking tool** for SBFN members to learn from and compare peer approaches, track and review progress against global benchmarks, develop common concepts and definitions, and leverage innovations and strengths; and

a **forward planning and capacity building tool** to identify future policy pathways and capacity building needs.

The Measurement Framework is based on three intersecting themes in sustainable finance. For each theme, it assesses regulatory guidance, supervision strategies, disclosure requirements, and voluntary industry approaches.

ESG Integration refers to the management of environmental, social, and governance (ESG) risks in the governance, operations, lending, and investment activities of financial institutions.

Climate Risk Management refers to new governance, risk management, and disclosure practices that financial institutions can use to mitigate and adapt to climate change.

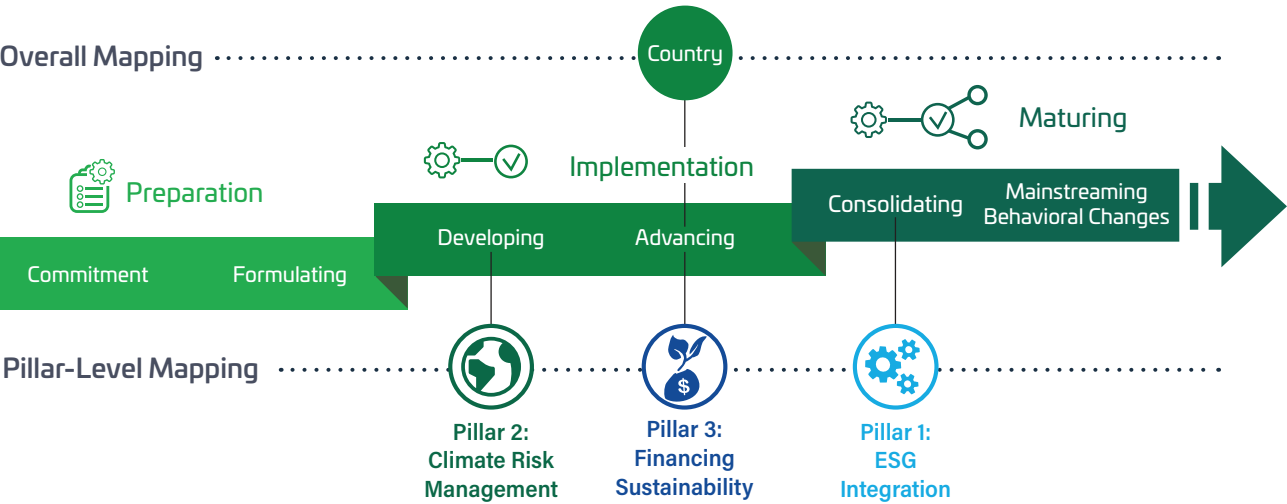

Financing Sustainability refers to initiatives by regulators and financial institutions to unlock capital flows for activities that support climate, green economy, and social goals. This includes new products like green bonds and sustainability-linked loans. Initiatives include definitions, guidance, taxonomies, monitoring, and incentives.

The Measurement Framework consists of three complementary components:

1. Progression matrices

Drawing on SBFN members’ common development paths and milestones, the **SBFN Progression Matrix** provides an overview of market-wide progress for all SBFN countries across three typical stages of development. It allows each SBFN member to review its own progress and identify the strengths and weaknesses of its approach.

The stage mapping is based on qualitative milestones and quantitative analysis related to (i) progress in developing and implementing national policies and principles, and (ii) industry uptake and practices. In the 2021 report, in addition to the Overall Progression Matrix, three pillar-level matrices are added to reflect a country’s development process in each of the pillar areas.

2. Pillar benchmarking

A dynamic assessment is conducted across several priority pillars of sustainable finance, using qualitative and quantitative datapoints to assess progress and allow comparison across countries. Three pillars, three cross-cutting sub-pillars, 11 cross-cutting indicators, and 75 underlying datapoints are used to objectively assess a country’s sustainable finance framework(s), according to clarity, depth, and alignment to international good practice.

	Pillar 1: ESG Integration	Pillar 2: Climate Risk Management	Pillar 3: Financing Sustainability
<div>Sub-pillar 1: Strategic Alignment</div>	<ul style="list-style-type: none"> National framework Alignment with international goals and standards Alignment with national goals and strategies 		
<div>Sub-pillar 2: Regulatory and Industry Association Actions</div>	<ul style="list-style-type: none"> Overall approach and strategy Technical guidance Supervisory activities and incentives Tracking and aggregated disclosure 		
<div>Sub-pillar 3: Expectations of Financial Institution (FI) Actions</div>	<ul style="list-style-type: none"> Strategy and governance Organizational structure and capacity Policies and procedures Tracking, reporting, and disclosure 		

3. Sector data and case studies

In 2021, data collection included an exploratory request for quantitative data points — where available — for the number and percentage of financial institutions that are implementing ESG integration as well as climate risk management and disclosure; and the total value of green, social, and sustainability bond issuance. Detailed case studies were also collected of innovative approaches by regulators and industry. Case studies will be published in a new on-line case study catalogue.

SBFN Measurement Framework pillars, sub-pillars, indicators, and underlying datapoints

Pillar 1: ESG Integration			
Sub-pillar	Indicator	No.	Underlying datapoint
Strategic Alignment	National framework ¹ (e.g. policies, roadmaps, guidance, regulations, voluntary principles, templates, or tools)	1	Has the regulator or industry association published a national framework ("Framework") for the banking sector that sets out expectations for integrating the consideration of environmental, social, and governance (ESG) risks and performance?
		2	Has the relevant regulator or industry association published a Framework for capital markets, investment, insurance or other non-lending FIs that sets out expectations for integrating the consideration of ESG risks and performance?
	Alignment with international goals and standards	3	Does the Framework make reference to international sustainable development frameworks or goals?
		4	Does the Framework make reference to established international ESG risk management standards and principles for FIs?
	Alignment with national goals and strategies	5	Does the Framework make reference to specific national development objectives, plans, policies, goals, or targets?
		6	Does any cooperation exist between agencies or between the regulator and industry association with respect to policy design and/or implementation related to ESG integration?
		7	Does any inter-agency data sharing currently exist related to ESG integration by FIs?
Regulatory and Industry Association Actions	Overall approach and strategy	8	Does the Framework provide guidance on the role of the regulator or industry association with regard to assessing and managing ESG risk and performance in the financial sector?
		9	Has the regulator or industry association undertaken market assessment to identify systemic ESG risks through analysis of the portfolios of supervised entities/members and published the results?
	Technical guidance	10	Does the Framework provide technical guidance or tools to support implementation of ESG risk and performance management by the financial sector?
	Supervision activities and incentives	11	Is the implementation of the Framework regularly monitored and/or information regularly collected from FIs by the regulator and/or industry association?
		12	Does the regulator or industry association provide any financial or non-financial incentives for FIs to manage ESG performance as part of the Framework?
		13	Does the regulator or industry association apply any disincentives/penalties for non-compliance by FIs in terms of expectations from the regulator and/or industry association related to ESG risk management as part of the Framework?
	Tracking and aggregated disclosure	14	Has the regulator or industry association established a data collection approach and database to track or regularly publish data related to ESG integration by FIs as part of the Framework?
Expectations of FI Actions	Strategy and governance	15	Does the Framework require/ask the FI's board of directors (or highest governing body) to approve an ESRM and/or ESG integration strategy, and to supervise its implementation?
	Organizational structure and capacity	16	Does the Framework require/ask FIs to allocate resources/budget commensurate with portfolio ESG risks and define roles and responsibilities for ESG integration within the organization?
		17	Does the Framework require/ask FIs to develop and maintain the ESG expertise and capacity of staff commensurate with portfolio ESG risks through regular training and learning?
		18	Does the Framework require/ask FIs to create incentives for managers to reduce the ESG risk-level of the portfolio over a specified timeframe?
	Policies and procedures	19	Does the Framework require/ask FIs to develop policies and procedures to identify, classify, measure, monitor, and manage ESG risks and performance throughout the financing cycle at the client level and/or the transaction/project level?
		20	Does the Framework require/ask FIs to undertake a regular review and monitoring of ESG risk exposure at aggregate portfolio level?
		21	Does the Framework require/ask FIs to establish and maintain an external inquiry/complaints/grievance mechanism for interested and affected stakeholders in relation to ESG practices?
	Tracking, reporting, and disclosure	22	Does the Framework require/ask FIs to report ESG risks and performance to the regulator or industry association?
		23	Does the Framework require/ask FIs to report on ESG integration publicly?
		24	Does the Framework require/ask FIs to track credit risk (e.g. loan defaults) and/or financial returns in relation to ESG risk level?
Pillar 2: Climate Risk Management			
Strategic Alignment	National framework	25	Has the regulator or industry association published a national framework ("Framework") for the banking sector that sets out expectations for integrating the consideration and management of climate risks and their impact in the national economy?
		26	Has the relevant regulator or industry association published a Framework for capital markets, investment, insurance, or other non-lending FIs that sets out expectations for integrating the consideration and management of climate risks and their impact in the national economy?
	Alignment with international goals and standards	27	Does the Framework make reference to international agreements or frameworks to address climate?
		28	Does the Framework recognize or align with established regional or international good practice for climate risk management and disclosure by FIs?
	Alignment with national goals and strategies	29	Has the regulator or industry association aligned the Framework with national goals to address climate change in line with the country's Nationally Determined Contributions (NDCs) to the Paris Agreement?
		30	Does any cooperation exist between agencies, or between government and industry association, with respect to policy design or implementation related to climate risk management?
		31	Does any inter-agency data sharing currently exist related to climate risk management by FIs?

¹ **National framework** refers to the collective set of policies, roadmaps, guidance, regulations, and/or voluntary principles issued by national regulators or industry associations in relation to each pillar of sustainable finance. SBFN recognizes that national frameworks for sustainable finance vary from country to country and are influenced by national priorities and characteristics. They are also often interdependent with other national roadmaps, policies, and regulations. Countries vary in their starting points and the types of documents to kickstart the enabling framework. For instance, initial frameworks could choose to focus on ESG risk management and/or sustainable finance opportunities such as green bonds. They could also focus on banking, capital markets, or institutional investors. The variety of SBFN frameworks provides a rich source of inspiration for peer learning and collaboration.

Regulatory and Industry Association Actions	Overall approach and strategy	32	Has the regulator or industry association undertaken research on historical impacts to the economy and financial sector from climate change, and/or future expected impacts resulting from physical and transition climate risks?
		33	Does the Framework identify key sources of GHG emissions – such as in particular sectors – as priorities in the proactive management of climate risks by the financial sector?
		34	Does the Framework incorporate the conservation/restoration of natural carbon sinks (such as oceans, forests, mangroves, grasslands, and soils) as an important part of reducing climate change risks (e.g., through guidelines, scenario analysis, targets, or incentives for FIs)?
		35	Has the regulator or industry association developed an internal strategy to address climate risk, and/or embedded climate risk management into its governance, organizational structures, and budget as part of the Framework?
		36	Has the regulator or industry association undertaken any activities to expand and deepen analytical understanding of national and/or cross-border physical and transition climate risks, and to raise awareness as to how these risks may transmit to, and impact, the financial sector?
Regulatory and Industry Association Actions	Technical guidance	37	Has the regulator or industry association developed risk assessment approaches, methodologies, or tools to understand and assess the financial sector's exposure to climate risk as part of the Framework?
	Supervisory activities and incentives	38	As part of the Framework, has the regulator clarified supervisory expectations with regard to climate risk management by FIs, including consideration of international good practices?
		39	Has the regulator started to explicitly embed climate-related risk in supervisory activities and review processes as part of the Framework?
		40	Is the implementation of the Framework regularly monitored and/or information regularly collected from FIs by the regulator and/or industry association?
	41	Are there any financial or non-financial incentives to encourage FIs to establish climate risk management systems?	
Tracking and aggregated disclosure	42	Does the regulator or industry association regularly collect and/or report market-level and/or FI-level data on climate-related financial sector risks as part of the Framework?	
Expectations of FI Actions	Strategy and governance	43	Does the Framework require/ask FIs to establish a strategy for climate risk management with responsibility at the board of director level (or highest governing body)?
	Organizational structure and capacity	44	Does the Framework require/ask FIs to define the roles and responsibilities and related capacities of the FI's senior management and operational staff in identifying, assessing, and managing climate-related financial risks and opportunities?
	Policies and procedures	45	Does the Framework require/ask FIs to expand existing risk management processes to identify, measure, monitor, and manage/mitigate financial risks from climate change?
	Tracking, reporting, and disclosure	46	Does the Framework require/ask FIs to report on their overall approaches to climate risk management in line with international good practices (e.g. TCFD), or establish a timeline by which FIs should begin to align their reporting with such practices?
		47	Does the Framework require/ask FIs to identify, measure, and report on exposure to sectors which are vulnerable to transition risk and physical risk?
		48	Does the Framework require/ask FIs to adopt and report on performance targets to reduce portfolio greenhouse gas (GHG) emissions on a regular basis?
		49	Does the Framework require/ask FIs to adopt and report on performance targets to reduce exposure to climate change risks at the portfolio level on a regular basis?
Pillar 3: Financing Sustainability			
Strategic Alignment	National framework	50	Has the regulator or industry association published a national framework ("Framework") for the banking sector that sets out expectations for integrating the consideration of instruments, goals, and standards for financing sustainability, including requirements for ensuring credibility and managing and measuring resulting impacts in the national economy?
		51	Has the relevant regulator or industry association published a Framework for capital markets, investment, insurance, or other non-lending FIs that sets out expectations for integrating the consideration of instruments, goals, and standards for financing sustainability, including requirements for ensuring credibility and managing and measuring resulting impacts in the national economy?
	Alignment with international goals and standards	52	Has the regulator or industry association developed a strategy, regulations, or set of frameworks for stimulating the allocation of capital to sustainable assets, projects, and related sectors in line with global goals, such as the Sustainable Development Goals (SDGs)?
		53	Does the Framework recognize and/or align with existing standards, voluntary principles, or market good practices related to sustainable finance instruments?
	Alignment with national goals and strategies	54	Does the Framework enable the achievement of stated national objectives by guiding capital to sectors, assets, and projects that have environmental and social benefits in line with national sustainable development priorities, strategies, targets, and the size of sustainable investment needs, and taking into account the local barriers to scaling-up sustainable finance?
		55	Does any cooperation exist between agencies or between the regulator and industry association with respect to policy design or implementation related to sustainable finance flows?
		56	Does any inter-agency data sharing currently exist related to stimulating and monitoring sustainable finance flows?
Regulatory and Industry Association Actions	Overall approach and strategy	57	Does the Framework require/ask the regulator or industry association to establish mechanisms to identify and encourage the allocation of capital to sustainable sectors, assets, and projects?
	Technical guidance	58	Does the Framework provide definitions, examples, and/or a taxonomy (catalogue and guidelines) of sustainable finance assets?
		59	Does the Framework provide guidelines for extending green, social, or sustainability-focused loans (excluding bonds)?
		60	Does the Framework provide guidelines for issuance of green, social, or sustainability bonds?
		61	Does the Framework require/ask for external party verification to ensure the credibility of sustainability instruments?
	Supervisory activities and incentives	62	Does the regulator or industry association monitor information reported by FIs related to green/social/sustainability investment, lending, and other instruments to prevent greenwashing and social-washing?
		63	Are there any financial or non-financial incentives for FIs to develop and grow green, social, or sustainability finance instruments?
	Tracking and aggregated disclosure	64	Does the regulator or industry association collect and/or publish data from FIs or other sources about allocation of capital to green/social/sustainability assets, projects, or sectors?

Expectations of FI Actions	Strategy and governance	65	Does the Framework require/ask FIs to establish a strategy, governance, or high-level targets, including at the Board of Directors level, for capital allocation to sustainable assets, projects, or sectors?
	Organizational structure and capacity building	66	Does the Framework require/ask FIs to define internal staff roles and responsibilities to encourage finance flows to green, social, and/or sustainability-focused investments?
		67	Does the Framework require/ask FIs to develop and maintain internal staff capacity on green, social, or sustainability products through regular training and learning?
	Policies and procedures	68	Does the Framework require/ask FIs to put in place policies and procedures for defining, issuing, managing proceeds, tracking performance, and reporting on green, social or sustainability-focused products?
		69	Does the Framework require/ask FIs to appoint an independent external reviewer to confirm that the FI's internal framework meets the requirements of the recognized national framework and regulations, or aligns to international standards?
		70	Does the Framework require/ask that FIs create incentives for managers to increase sustainable loans or investments in the portfolio?
	Tracking, reporting, and disclosure	71	Does the Framework require/ask FIs to publish annual updates on the performance and impacts of the sustainability instruments in compliance with relevant national and/or international standards?
		72	Does the Framework require/ask FIs to obtain and disclose independent review of metrics reported annually in relation to the social and environmental outcomes and impacts achieved through the sustainability instruments?
		73	Does the Framework require/ask FIs to report to the regulator(s) or industry association(s) on allocation and/or outcomes of green, social, and/or sustainability loans?
		74	Does the Framework require/ask FIs to report to the regulator(s) or industry association(s) on green, social, and/or sustainability bonds or other positive impact investments?
		75	Does the Framework require/ask FIs to report publicly on their green, social, and sustainability-focused finance activities and positive outcomes or impacts (i.e. not only to the regulator or shareholders)?
